

ACME X100 Cordless Vacuum Cleaner - User Manual

Thank you for purchasing the ACME X100 cordless stick vacuum cleaner. This manual explains how to set up, operate, and maintain your new vacuum. Please read it fully before first use and keep it for future reference.

What is in the box: the X100 main unit, a charging dock, a power adapter, a crevice tool for tight corners, a motorized brush head for carpets, and this user manual.

The X100 is designed for dry indoor cleaning of floors, carpets, furniture, and car interiors.

2. Important Safety Instructions

Read all instructions before using the appliance. Do not vacuum liquids of any kind. Do not vacuum burning or smoking items such as cigarettes, matches, or hot ashes.

Use only the power adapter supplied in the box. Do not charge the unit with a damaged cable or a damaged dock.

Keep the appliance and its packaging away from small children. Do not expose the battery to temperatures above 60 degrees Celsius. Do not attempt to open the motor housing yourself.

3. Charging the Battery

Place the X100 on the charging dock. The LED indicator blinks blue while charging and turns solid green when charging is complete.

A full charge takes approximately four hours from empty. The vacuum cannot be used while it is on the dock.

The X100 uses a removable lithium-ion battery. If you plan to store the vacuum unused for several months, store the battery at roughly half charge in a cool, dry place.

4. Operating Modes

Press the power button to start the vacuum. Press the MODE button to cycle between the three suction modes:

Eco mode: up to 45 minutes of runtime. Best for hard floors and daily cleaning.

Standard mode: up to 30 minutes of runtime. Balanced suction for carpets and rugs.

Turbo mode: up to 12 minutes of runtime. Maximum suction for deep cleaning and stubborn debris.

The small display on the handle shows the selected mode and the estimated remaining runtime in minutes.

5. Maintenance: Dust Container and Filter

Empty the dust container whenever the dust reaches the MAX line. Press the release button to detach the container and empty it over a bin.

Cleaning the filter: remove the filter from the top of the dust container and tap it gently against the bin to knock off loose dust. Then rinse the filter under cold running water until the water runs clear.

Let the filter dry completely for 24 hours before putting it back. Never install a wet or damp filter. Replace the filter with a new one every six months for best performance.

Brush roll care: remove tangled hair or threads from the brush roll carefully with scissors.

6. Troubleshooting

The vacuum does not turn on: the battery may be empty. Charge the unit for at least 30 minutes and check that the battery is clicked in fully.

Weak suction: empty the dust container and check the filter for clogging. A blocked filter is the most common cause of weak suction.

The vacuum stops suddenly during use: the overheat protection may have activated. Switch the unit off and let it cool for 45 minutes.

The LED flashes red: this indicates a battery fault. Stop using the unit and contact customer support.

7. Warranty and Support

The ACME X100 comes with a twelve (12) month limited warranty starting from the date of purchase. The warranty covers manufacturing defects in materials and workmanship.

The warranty does not apply to normal wear, filters, damage caused by liquids, or damage caused by misuse. Keep your receipt as proof of purchase.

Free extension: register your product within 30 days of purchase at acme-support.example.com/register to extend the warranty to twenty-four (24) months at no extra cost.

Customer support: support@acme-example.com or 1-800-555-0142, Monday to Friday, 9:00 to 17:00.

8. Technical Specifications

Model: ACME X100 cordless stick vacuum

Motor power: 350 watts

Battery: 21.6 V lithium-ion, 2500 mAh, removable

Weight: 2.8 kg

Dust container capacity: 0.6 liters

Noise level: 72 dB in Standard mode

Filter: HEPA filter, replace every six months

Dimensions: 25 x 22 x 112 cm assembled
